

Visiting a Terminal Moraine in Yosemite Valley

You may choose to visit the terminal moraine left behind 10,000 years ago by the last glacier in Yosemite Valley. Parking in two dirt pullouts is available close to the Terminal Moraine. Buses can park in the second dirt pullout, which is 0.8 miles from the bridge indicated in the map. See map below for directions. The easiest access on foot to the moraine is indicated by a dotted line from the second dirt pullout.
